

## 65 millions of years ago dinosaurs disappeared completely

1

A big meteorite  
crashed into the  
Earth...

2

... and caused a  
global catastrophe

3

The Earth became  
very cold and  
dark

4

Cold-blooded  
animals like  
dinosaurs died

5

But some turtles, crocodiles, primitive birds and  
mammals survived to give rise to modern animals
