Milestones and Deliveries in the project

The Simulation Method
used in a class learning
Gaelic

The Simulation Method DVD
Prototype menu.

The subtitles in English,
German, Romanian, and
Spanish are now been
prepared

The videos for the
Simulation method were
recorded on Skye by two
members of the Danish team,
Ulf Günthersen and Kent
Andersen.

The final edits of the videos
contain:

A. An interview where the
Gaelic teacher Iain Mac an
Tailleir describes how he has
worked with the method

B. A lesson in a class using a
Simulation there is on the DVD
a choice of Gaelic or English
introductions

The lesson materials used
for the Simulation that can
be seen on the DVD can now be
downloaded from the project
website www.languages.dk/methods

The material is ready for use in
Basque, Danish, Dutch, English,
Gaelic, German, Romanian, and
Spanish.

The simulation plot used for the
lesson is to choose participants
for a "project" with different
consequences depending on the
choices.

We have now finished the
five planned manuals:
Computer Assisted Language
Learning, Task Based Teaching,
Simulations, Tandem Learning,
and the PhyEmoC method. The
manuals can be downloaded in
English, German, Romanian, and
Spanish from the project website
www.languages.dk/methods

All the methods described in
the manuals above have
materials ready to use in the
the eight project languages.
The materials can be downloaded
from [www.languages.dk/methods/
materials](http://www.languages.dk/methods/materials)

The project website is
attracting more and more
visitors, many of these come
through search engines like
Yahoo and Google.

We have recently found that
these two search engines now
place our project website as
number one when someone searches
for language teaching methods.

Computer Assisted Language Learning In Context, **DONE**
 Task Based Teaching: **DONE**
 Student travel guide, **DONE**
 Simulations, Tandem Learning, and PhyEmoC manuals- **DONE**
 Final DVD post production started

Kent Andersen interviewing Bogdan Georgescu and Mihai Braslasu about their experiences with the PHYEMOC method.

Students being taught Romanian through the PHYEMOC method. The students carry masks to represent Romanian folklore characters

Bogdan Georgescu and Mihai Braslasu preparing for the PHYEMOC lesson

M eet the project teams at the final project conference October 15th - 17th in Odense, Denmark.

The conference is organised together with EfVET and Eurocall.

More information is available from the project web www.languages.dk/methods or download the conference announcement from:

www.languages.dk/methods/documents/Conference_announcement.pdf

Online registration for the conference:

www.efvet.org/conferences/BPBLTMRegistration.html

Y ou also have a chance of meeting us at the EuroCall in August where we have a Show and Tell presentation

The project products will also be presented at several roundtable presentations in Tuscany during the EfVET annual conference in October. Go to the EfVET website www.efvet.org to register for the EfVET conference

D issemination at the TESOL conference in Long Beach was through flyers, free DVDs and a combined T-shirt and DVD lottery.

A total of 200 flyers were handed out and we sponsored 20 Project T-shirts and DVDs to be used at the TESOL lottery

T he videos to be used for the PHYEMOC DVD were recorded in Pitesti, Romania by Kent Andersen.

The DVD comprises four units:

- A. An interview on the use of the method
- B. The teacher telling about lesson preparations
- C. A class being taught using the method
- D. Post lesson interview

First layout for the PHYEMOC DVD menu.

The actual lesson was divided into two parts, i.e. had two activities. The students learned Romanian words for directions, numbers, and letters by first being pushed around on a chess board and then followed by two kind of games using the chess board.

P lease e-mail ka@ots.dk if you are interested in helping us evaluate our results. We offer our evaluators a choice of the project T-shirts in sizes S, M, L, XL, XXL, and XXXL
